

"THEE ULTERIOR REMOVAL VAN OV COUM" (EXCERPT)

COUM is a means ov removal. Removing thee barriers between energy, intuition and body. Removing thee ego and thee premeditated act ov creation.

COUM is a transmission ov energy. There are no media, only transmissions expressed in thee way that they demand, allowing cosmosis \* to occur.

COUM is a search for temporary definitions. A series ov arbitrary statements fixing in more concrete terms thee eternal, non-existent paradox ov time, for no reason.

COUM requires hesitancy and uncertainty in its special relationship with "reality".

COUM transmissions are unspecific in order and meaning by virtue ov their preciseness.

COUM is an absolute collision that leads to a penetration wondrous to behold.
